

Sahil Ashar

sahilashar21@gmail.com — +91 8208937883 — GitHub — LinkedIn

Objective

Full-Stack Software Developer with hands-on experience building AI-driven and automation-focused systems, including document intelligence pipelines, backend services, and intelligent workflows. Strong expertise in Python-based automation, backend APIs, and cloud deployments, with experience handling real-world unstructured data. Passionate about applying AI and automation to improve operational efficiency, scalability, and reliability in production systems.

Technical Skills

Programming: Python, JavaScript, C++, Java

AI / ML: LLM API usage, prompt-based systems, chatbot development, text-based data handling, ML-assisted automation

Backend: Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, MySQL, Firestore

Automation: n8n

Deployment & Systems: Linux, Nginx, Docker (basic), AWS EC2, Render, Vercel

Frontend / Mobile: React.js, React Native, Flutter

Tools: Git, GitHub, VS Code

Projects

AdCraft – AI-Based Advertisement Generation Platform (Ongoing)

- Built text-driven pipelines to generate advertisement content from structured prompts and campaign inputs.
- Designed backend services to automate content generation workflows and manage generated ad creatives.
- Implemented prompt structuring and output validation to ensure relevance and consistency.

GitHub: github.com/Sahilashar21/adcraft

Document Intelligence – Financial Report Analysis System

- Built a Python pipeline to extract and structure the MD&A section from corporate annual report PDFs.
- Handled multi-page documents, inconsistent layouts, and long-form narrative text.
- Generated structured Excel outputs for downstream analysis.

Dev Agent – Developer Learning Platform

- Developed backend pipelines for chatbot-driven responses and user query handling.
- Implemented structured data flows for quizzes and roadmap-based learning.

GitHub: github.com/Sahilashar21/dev-agent

RakshaYantra – Phishing Detection System

- Built backend pipelines to analyze URLs, email text, and metadata.
- Automated scanning workflows using external security APIs.

GitHub: github.com/Sahilashar21/RakshaYantra-AI

Experience

Software Development Intern

Dec 2025 – Present

VidyarthiMitra.org, Mumbai · Hybrid

- Developing and deploying web and mobile applications for an educational platform.
- Designing application workflows and backend logic for internal systems.
- Working with data collection, cleaning, and production deployments.

Web Development Intern

Sept 2024 – Oct 2024

Paranubhuti Foundation, Remote

- Developed and maintained WordPress websites.
- Improved site performance, responsiveness, and basic SEO.
- Assisted with content updates and deployment changes.

Education

B.Voc in Software Development — Jai Hind College, Mumbai

2023 – 2026

CGPA: 9.6 / 10

Certifications

Junior Software Developer Version 3.0 – NASSCOM (Apr 2025)

AWS Cloud Practitioner — Currently Pursuing

Achievements

- Developed and deployed multiple live projects used by real users.
- Certificate of Appreciation — Tech Srujan, Jai Hind College.
- Working on a live institutional library repository deployed on college servers.
- 2nd Place – Fiestron Hackathon (KC College).
- 2nd Place – Next Edge Conclave (VSIT).
